

Greetings,

Town Staff and Council met with Waste Management on Friday morning, March 28, 2014, to get an update on the removal of yard waste from the recent ice storm. As we all know, the volume is great and the one day a week schedule is slow. This problem is not just in Chadbourn, but throughout the county. WM is working hard, taking 3 to 4 loads to the waste yard each Monday. Council will review 4 proposals on Tuesday night, April 1, 2014, which will include one from WM. Council will select a company to remove all remaining waste within 2 weeks. Our goal is to have Chadbourn cleaned up at least a week prior to the Strawberry Festival. If you have current waste, please add it to the existing pile; do not start a new pile. Thank you for your patience. Also, our Public Works Department has been aiding in the cleanup as their schedule permits.

The Parks and Recreation's baseball season has started. Please support this program. Thanks to our Staff, Advisory Board, coaches and parents for their work.

Tuesday night, Council will finalize the new lighting proposal. Every street light will be changed and 10 additional poles installed.

Have a wonderful Spring.
